### **8510 - WELLNESS**

As required by law, the Board of Education establishes the following wellness policy for the Van Dyke Public Schools.

The Board recognizes that good nutrition and regular physical activity affect the health and well being of the District's students. Furthermore, research concludes that there is a positive correlation between a student's health and well being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
  - 1. The standards and benchmarks for nutrition education shall be behavior focused.
  - 2. Nutrition education shall extend beyond the school by engaging and involving families and the community.
  - 3. Nutrition education shall reinforce lifelong balance by emphasizing the link between caloric intake (eating) and exercise in ways that are age-appropriate.
  - 4. The District shall provide information to parents that is designed to encourage them to reinforce at home the standards and benchmarks being taught in the classroom.
  
- B. With regard to physical activity, the District shall:
  - 1. **Physical Education**

- a. The physical education curriculum shall provide sequential instruction related to the knowledge, attitudes, and skills necessary to participate in lifelong, health-enhancing physical activity.
- b. The sequential, comprehensive physical education curriculum shall stress the importance of remaining physically active for life.
- c. Planned instruction in physical education shall teach cooperation, fair play, and responsible participation.
- d. Planned instruction in physical education shall meet the needs of all students, including those who are not athletically gifted.
- e. Planned instruction in physical education shall promote participation in physical activity outside the regular school day.

2. **Physical Activity**

- a. Physical activity and movement shall be integrated, when possible, across the curricula and throughout the school day.
- b. The school shall encourage families and community organizations to institute programs that support physical activity of all sorts.

C. With regard to other school-based activities the District shall:

- 1. The schools shall schedule mealtimes so there is minimum disruption by bus schedules, recess, and other special programs or events.
- 2. Activities, such as tutoring or club meetings, shall not be scheduled during mealtimes, unless students may eat during those meetings.
- 3. Students are discouraged from sharing their foods or beverages with one another during meal times, given concerns about allergies and other restrictions on some students' diets.

- D. With regard to nutrition promotion, any foods and beverages marketed or promoted to students on the school campus, during the school day, will meet or exceed the USDA Smart Snacks in School nutrition standards.

Additionally, the District shall create an environment that reinforces the development of health eating habits, including offering the following health foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards meals designed to meet specific calorie ranges for age/grade groups.

All foods and beverages sold to students as fund-raisers outside of the school meals program during the regular and extended school day for consumption on the school campus shall meet the USDA competitive Food regulations, the Alliance for A Healthier Generation's Competitive Foods and Beverages Guidelines, and the USDA Smart Snacks in School nutrition standards.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy [8500](#), entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages as well as to the fiscal management of the program.
- B. As set forth in Policy [8531](#), entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).

The sale of foods of minimal nutritional value in the food service area during the lunch period is prohibited.

- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.
- D. All food items and beverages available for sale to students for consumption on the school campus (any area of property under the jurisdiction of the school that is accessible to students during the school day) between midnight and thirty (30) minutes after the close of the regular school day shall comply with the current USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, including, but not limited to, competitive foods that are available to students a la carte or as entrees in the dining area (except entree items that were offered on the National School Lunch Program (NSLP) or School Breakfast Program (SBP) menu on the day of and the day after they are offered on the NSLP or SBP menu), as well as food items and beverages from vending machines, from school

stores, or as fund-raisers, including those operated by student clubs and organizations, parent groups, or boosters clubs, allowing one (1) exempt food fund-raiser per school per week.

- E. All foods offered on the school campus during the school day shall comply with the current USDA Dietary Guidelines for Americans, including competitive foods available to student a la carte in the dining area, as classroom snacks, or from vending machines.
- F. All food and beverages that are provided, other than through sale, on the school campus during the school day (which may include classroom snacks, for classroom parties, and at holiday celebrations) shall comply with the current USDA Dietary Guidelines for Americans.
- G. All food service personal shall receive pre-service training in food service operations.

The Board designates the Superintendent or designee as the individual(s) charged with operational responsibility for verifying that the District meets the goals established in this policy.

The Superintendent shall appoint a District wellness committee that includes parents, students, representatives of the school food authority, educational staff (including health and physical education teachers), mental health and social services staff, school health professionals, members of the public and school administrators to oversee development, implementation, evaluation and periodic update of the wellness policy. The Wellness Committee shall be an ad hoc committee with members recruited and chosen annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's wellness policy;
- C. presentation of the wellness policy to the school board for approval;
- D. measurement of the implementation of the policy;
- E. recommendation for the revision of the policy, as necessary.

Before the end of each school year the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary and/or appropriate. In its review, the Wellness Committee shall consider evidence-based strategies in determining its recommendations.

The Superintendent shall report annually to the Board on the progress of the Wellness Committee and on its evaluation of policy implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining goals of policy.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall make information available on the district's website and post the policy on the District's website, including the Wellness Committee's assessment of the implementation of the policy.

The District shall assess the Wellness Policy at least once every three (3) years on the extent to which schools in the District are in compliance with the District policy, the extent to which the District policy compares to model wellness policies, and the progress made in attaining the goals of the District Wellness Policy. The assessment shall be made available to the public on the School District's web site.
